JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

SPAIN.

Report from Madrid—Severe epidemic of smallpox.

Vice-Consul Danziger reports, December 15, 1903, as follows:

Smallpox in its most virulent form is raging in Madrid, and one of the leading physicians in this city stated to me to-day that over 35,000 cases are registered. The mortality is frightful.

Foreign and insular statistical reports of countries and cities—Yearly and monthly.

BAHAMAS—*Dunmore Town.*—Two weeks ended December 25, 1903. Population, 1,232. One death. No contagious diseases.
